THE ASTROBOT DIARIES

Hi! We're the LEGO® Astrobots and we're getting ready to go where no tiny robot has ever gone before...Mars!

After months of training classes and flight simulations, we're ready for lift off!

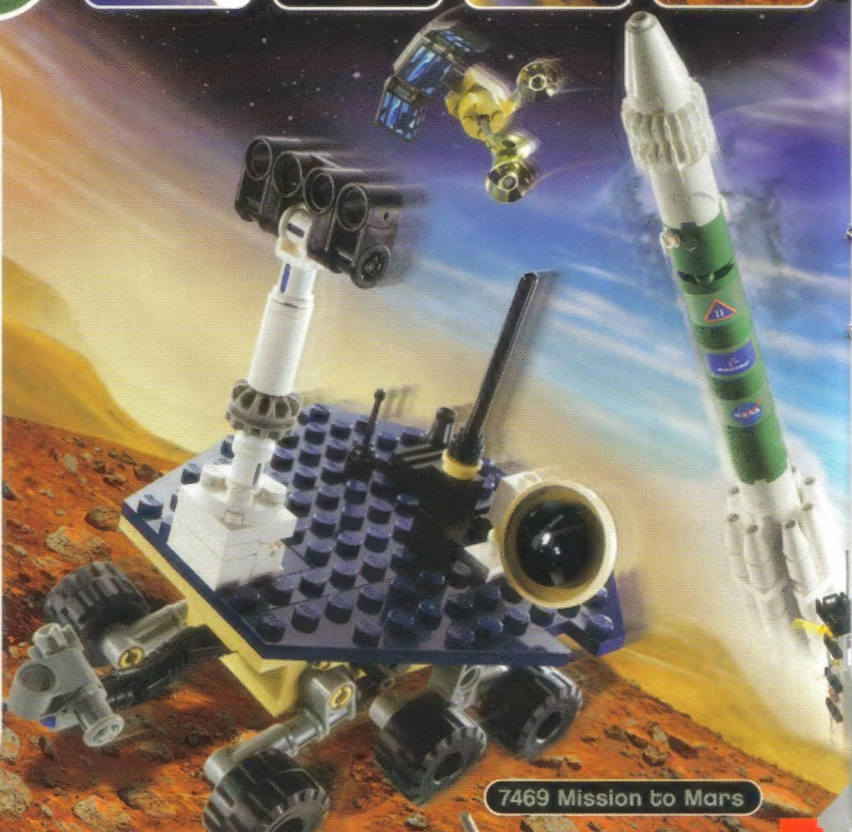

We'll travel right alongside the Mars rovers and give you an inside look at how a spacecraft works.

Once we're there, we'll ride the rovers as they examine martian rocks, dunes, and craters with 3D cameras, scraping tools and other cool scientific instruments. Our goal—to help you learn more about Mars.

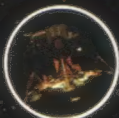

We'll also be dropping off a special DVD that includes the names of almost four million citizens of Earth. It's our gift to Mars and we're very proud to help deliver it.

So look for our scientific observations in upcoming issues of LEGO Magazine, or visit www.LEGO.com/discovery to check out our detailed Astrobot diary.

The Astrobots are part of The Planetary Society's Red Rover Goes to Mars project, done in partnership with the LEGO Company.

7469 Mission to Mars

LEGO Club Member Exclusive

Be the first astronaut on your block to build a replica of the Saturn V rocket that carried the Apollo astronauts to the moon!

The Saturn V was the largest rocket ever used, and the only one powerful enough to transport its astronaut crew all the way to the moon and back. This detailed set includes the booster rocket, lunar lander, and lunar vehicle so you can land, collect your share of moon rocks then reconnect to the orbiting service module for the voyage back to Earth.

For details on how you can get the new 7468 Saturn V Moon Mission, check out the LEGO Club Shop Special in this month's magazine!

PRACTICALLY OOZIN' WITH LEGO® NEWS 'N OTHER STORIES REAL AMUSIN'

WHAT WILL YOU MAKE, AMERICA?

LEGO Summer Festival Gearing Up to Go!

This summer, the LEGO company will celebrate creativity all across the USA with a one-of-a-kind traveling festival. The "What Will You Make, America?" tour is currently scheduling stops at various cities all across North America. Part building exposition, part summer celebration, this coast-to-coast carnival promises fun for both the

young and the not-so-young, with family building contests, cool LEGO prizes, and chances for local builders to showcase their top creations. There will also be a crew of expert LEGO Masterbuilders on hand with tons of building ideas and tips to help you become a better builder. Don't miss this amazing opportunity to learn from the best!

For a list of tour dates and locations, log on to www.LEGO.com/create.

Go One-on-One for LEGO Hoop Fun

Think you've got mad shooting skills? Then log on to www.LEGO.com/sports and check out the new LEGO Sports Basketball Challenge – the one-on-one hoop game that demands an expert shooting touch. Hook shots, flip shots, set shots, jump shots – they're all part of this exciting head-to-head shooting contest!

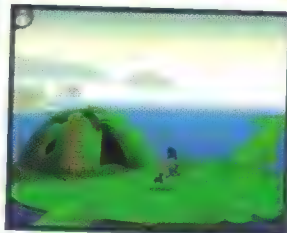

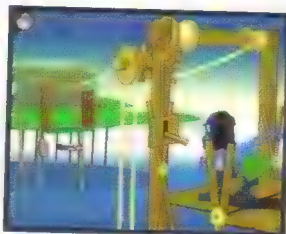

You start by launching long range shots as the clock ticks down, trying to hit as many buckets as you can before the buzzer sounds. Then you challenge your basketball buddies by typing in their email addresses and sending them your top score. Will they have the nerve and shooting skills needed to beat your best? Log on and find out in the LEGO Sports Basketball Challenge, playing this month at www.LEGO.com/sports.

The Votes Are In!

ALL LEGO Team Starting Lineup Announced

Votes came pouring in from all over the globe as LEGO Club members from Los Angeles to London elected their five favorite NBA® superstars to the very first ALL LEGO Basketball Team!

This past January, LEGO Magazine and the LEGO Sports website teamed up to sponsor the first ever ALL LEGO Team poll. Over the course of two months, LEGO Club members cast their votes to see which of the 24 hoop heroes currently offered as LEGO NBA Collectibles would be elected to the starting lineup of the ALL LEGO Basketball Team. Now the votes have been tallied and the starting five selected. For a firsthand look at the results of our highly scientific international poll, just turn the page!

Return to Mata Nui!

Ready for another island adventure? Mata Nui Online Game 2, sequel to one of the most popular BIONICLE® games ever, is scheduled to debut this month on www.BIONICLE.com! MNOG2 is being developed by Templar Studios, the same creative team that plunged you headfirst into adventure in the first Mata Nui Online Game. But this isn't just a repeat of Game One. The new game features even more action, more mystery, and more fun in the world of BIONICLE!

You begin play as Hahli, an adventurous Ga-Matoran training for a championship koli ball match. But events on Mata Nui soon take a dangerous turn and your incredible adventure begins. With new challenges being introduced each month, this is one online game you'll want to play over and over again. Check out MNOG2 on BIONICLE.com, beginning this month!

LOOK WHAT WE MADE!

We asked a few of our LEGO® Club members to take the new LEGO Designer Sets out for a "test" build. Here's what they had to say!

Name: Tyler Sypherd
Age: 6
Hobbies: LEGOS, LEGOS, LEGOS!
Designer Set: Wild Collection (4101)

I built twenty-three models in fourteen days. My favorite was the Lizard. It took me about an hour to build. I really like how its legs and tongue were made. I also really like the hinged pieces in the set. They allow me to make moveable creations. I liked the instruction book the best. It helped me think about new ways to make LEGO creations.

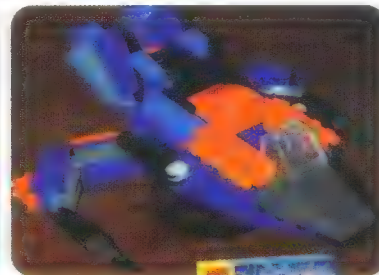

Name: Chris Wilson
Age: 11
Hobbies: Hockey, Creative Writing
Designer Set: Wild Collection (4101)

The Wild Collection is a great kit! I built at least 20 different models. My favorite from the Idea Book is the Giant Spider, and my favorite that I designed myself is a frog creature. I think the coolest thing about this set is how many different things you can create. I really want to check out more of these Designer Sets, especially the one with the big robot!

Name: Alexa Gellman
Age: 10
Hobbies: Sports, Art, Reading, Travel
Designer Set: Maximum Wheels (4100)

One of the many reasons I enjoyed this set is the different levels of difficulty it contains. For example, each of the models in the Idea Book is labelled with either one, two or three yellow bricks indicating how hard it is to build. I had a great time reviewing and building with this set and look forward to trying out some of the other sets.

Name: Ben Norris
Age: 13
Hobby: Skateboarding
Designer Set: Robobots (4099)

I built the large robot on the box first so I could see all the different pieces that came with the set. I've built several different models with this set and, so far, my favorites are the model on the front and a hovercraft that I designed. I really liked all the new pieces in this set because I didn't own many of them. Personally, I liked this set a lot so I wouldn't change anything about it.

ALL LEGO Designer Sets Feature:

- A special Idea Book packed with alternative models and step-by-step plans
- Unique new colors and pieces
- Moving elements that bring your models to life
- Three levels of building—Quick, Experienced and Advanced—to challenge the whole family!

Photographing Your Models

You've put a lot of work into your model so you want to make sure your photo looks as good as possible. Follow these tips for getting the best-looking shots.

Unless you are making a special background for your model, try to choose a shooting space that is simple and uncluttered. If possible find a background that is either much lighter or much darker than the object you are shooting.

See if your camera has a "macro" function. This setting is good for getting very close to your subject. Filling the entire frame with the object can really show off your handwork.

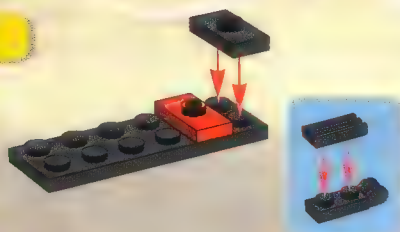

When possible, shoot in a space that is brightly lit by the sun but try to avoid direct sunlight. Direct patches of light can cause hot spots and glare on your object while making the rest of the image appear too dark.
